

GitLab - Adding Users

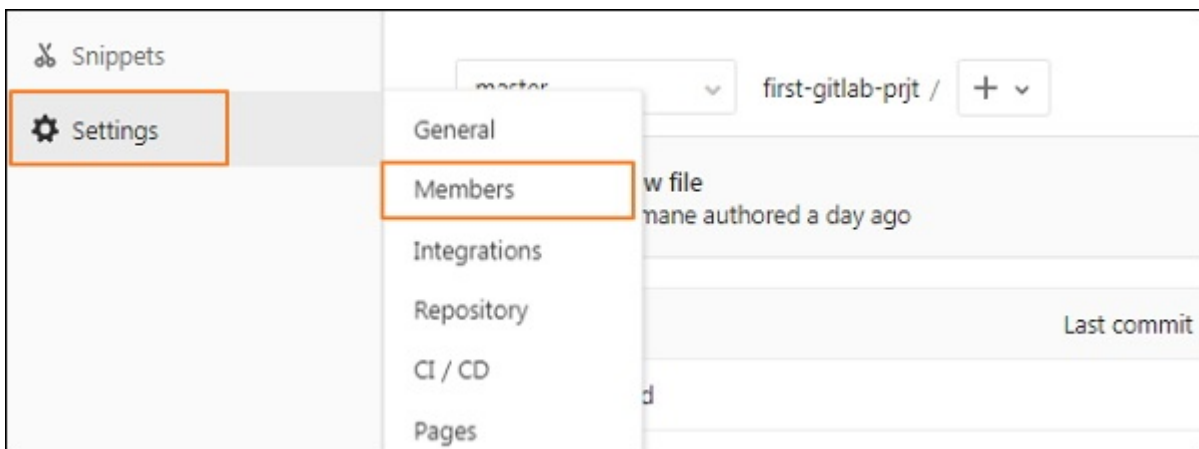

In this chapter, we will discuss about how to add users to your project in the GitLab.

Steps for Adding User

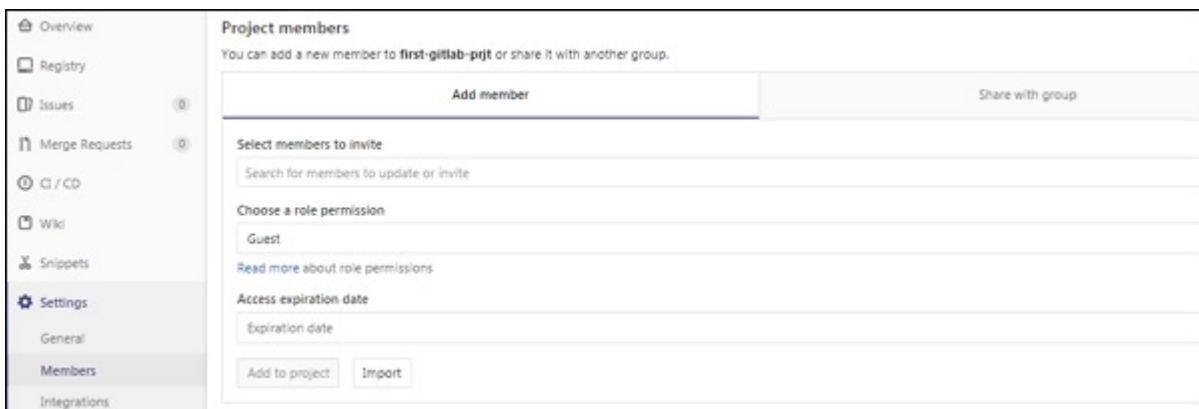

Step 1 – Login to your GitLab account and go to your project under *Projects* section.

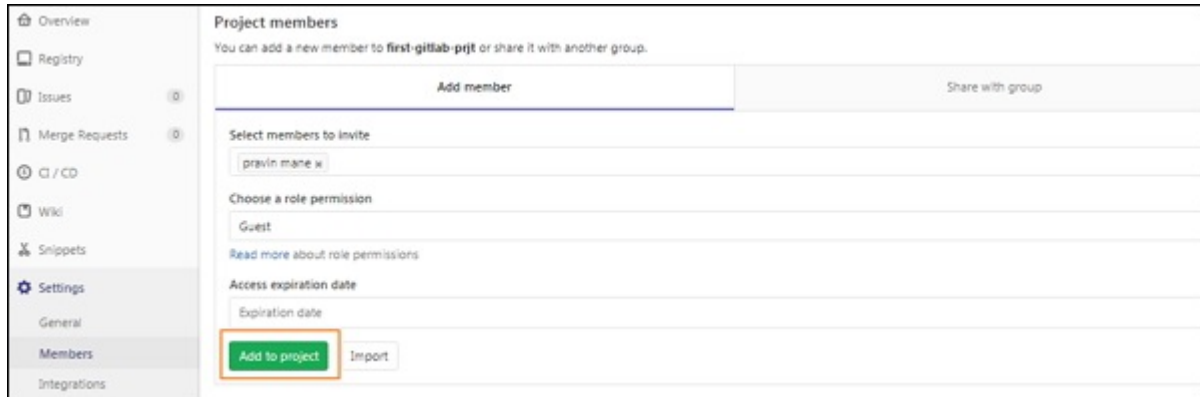

Step 2 – Next, click on the *Members* option under *Settings* tab –

Step 3 – It will open the below screen to add the member to your project –

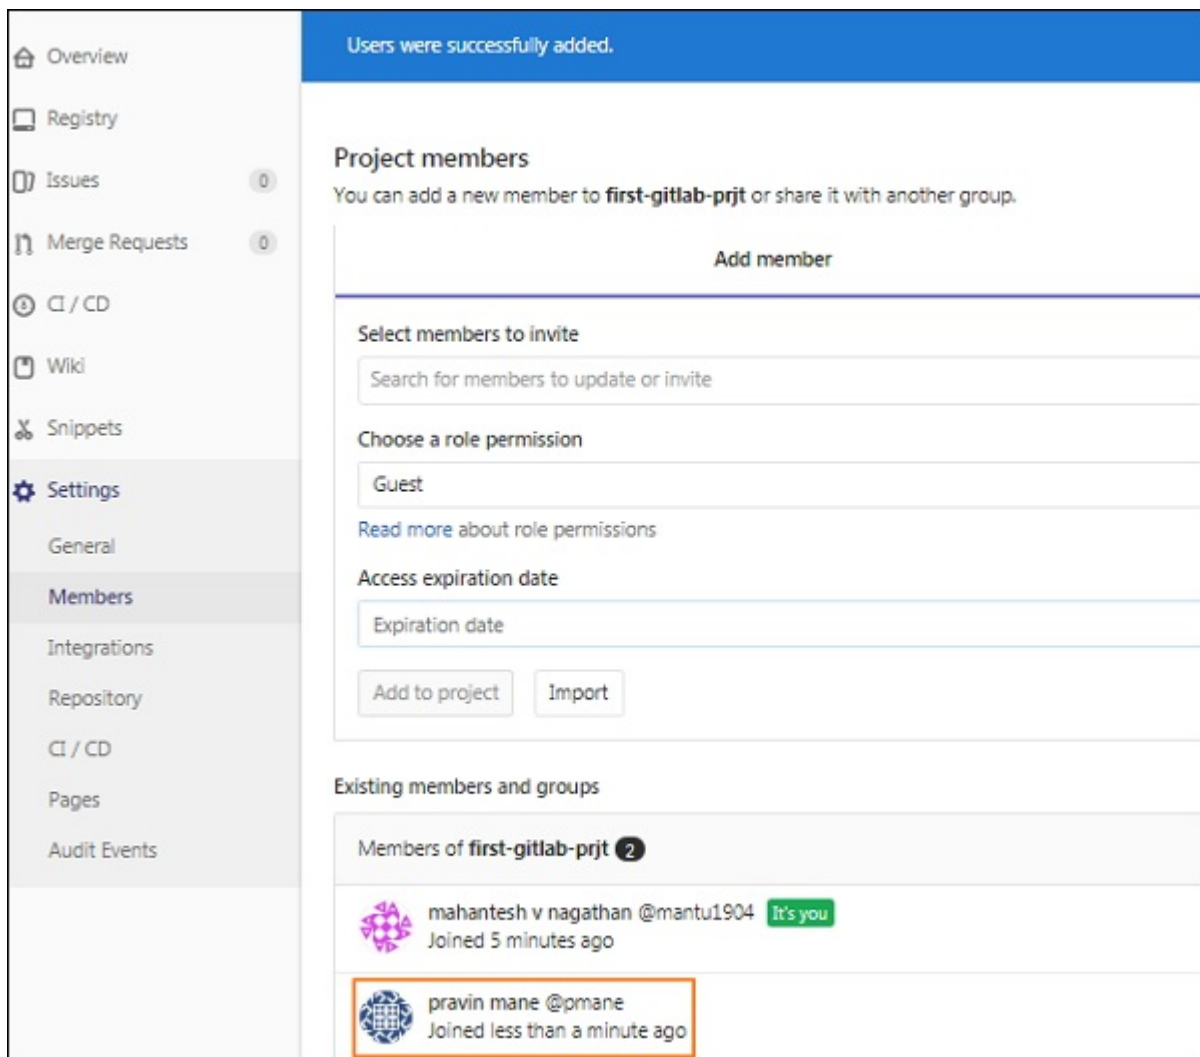

Step 4 – Now enter the user name, role permission, expiration date(optional) and click on *Add to project* button to add the user to project –

The screenshot shows the 'Project members' page in GitLab. On the left is a sidebar with navigation links: Overview, Registry, Issues, Merge Requests, CI / CD, Wiki, Snippets, Settings (highlighted), General, Members, and Integrations. The main content area is titled 'Project members' and includes a sub-header 'You can add a new member to first-gitlab-prjt or share it with another group.' Below this is a form with the following fields: 'Add member' (text input), 'Share with group' (button), 'Select members to invite' (text input with 'pravin mane w' entered), 'Choose a role permission' (dropdown menu with 'Guest' selected), 'Read more about role permissions' (link), 'Access expiration date' (text input), and 'Expiration date' (text input). At the bottom of the form are two buttons: 'Add to project' (highlighted with an orange box) and 'Import'.

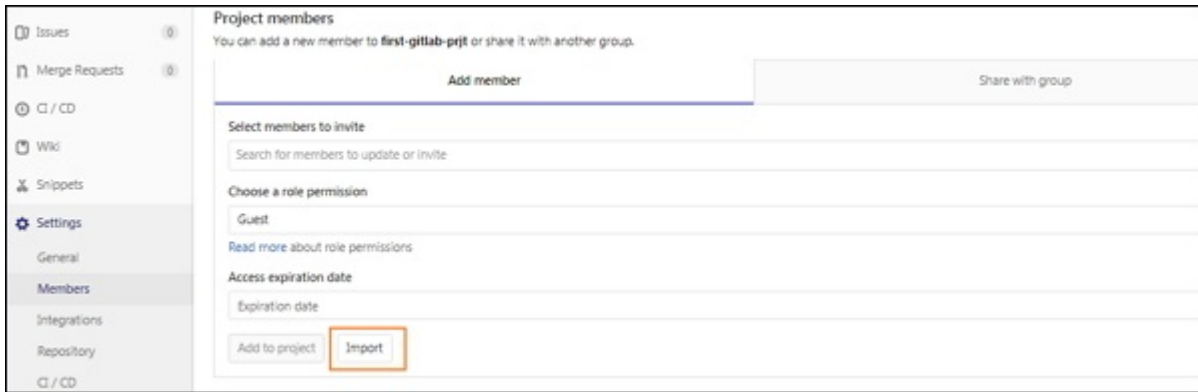

Step 5 – Next, you will get a successful message after adding user to the project.

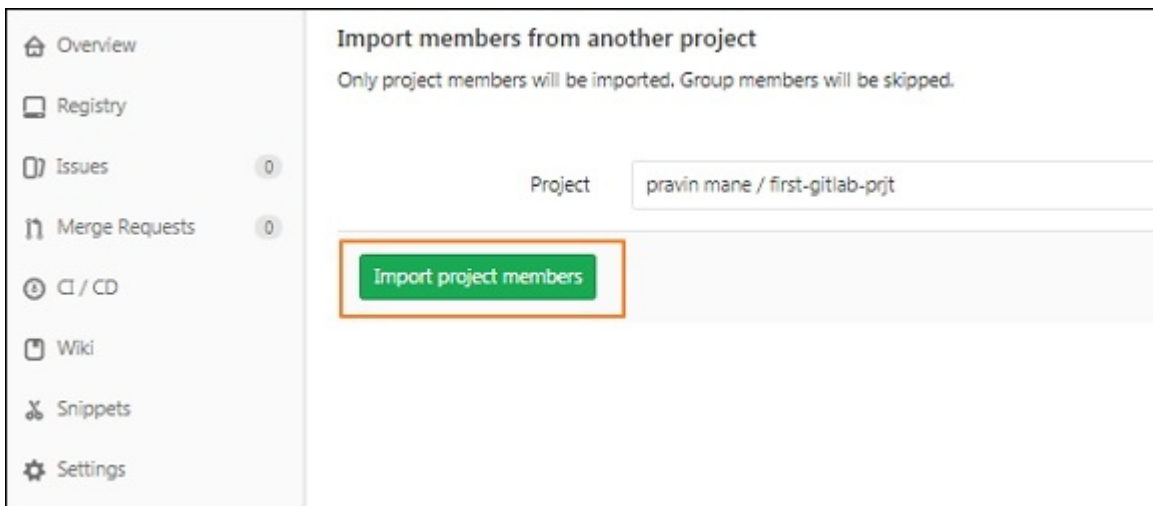

The screenshot shows the 'Project members' page in GitLab after a successful addition. A blue banner at the top reads 'Users were successfully added.' The 'Add member' form is still visible, with the 'Add to project' button highlighted with an orange box. Below the form is a section titled 'Existing members and groups' which contains a list of members for the project 'first-gitlab-prjt'. The list shows two members: 'mahantesh v nagathan @mantu1904' (joined 5 minutes ago) and 'pravin mane @pmane' (joined less than a minute ago). The 'pravin mane @pmane' entry is highlighted with an orange box.

The highlighted box in the above image indicates, a new user has been added to the project –

Step 6 – You can also add user to the project by clicking on the *Import* button –

Step 7 – Now select the project from which you want to add the user to your project and click on the *Import project members* button –

Step 8 – You will get a success message after importing user to the project –
