

GitLab - Merge Requests

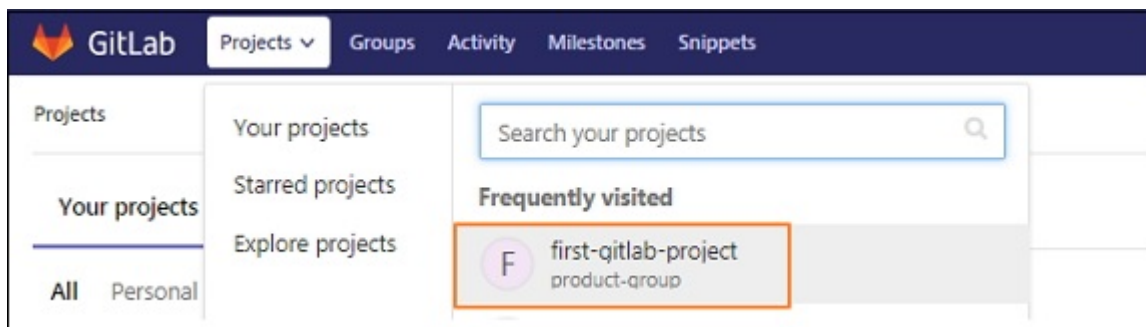

Description

Merge request can be used to interchange the code between other people that you have made to a project and discuss the changes with them easily.

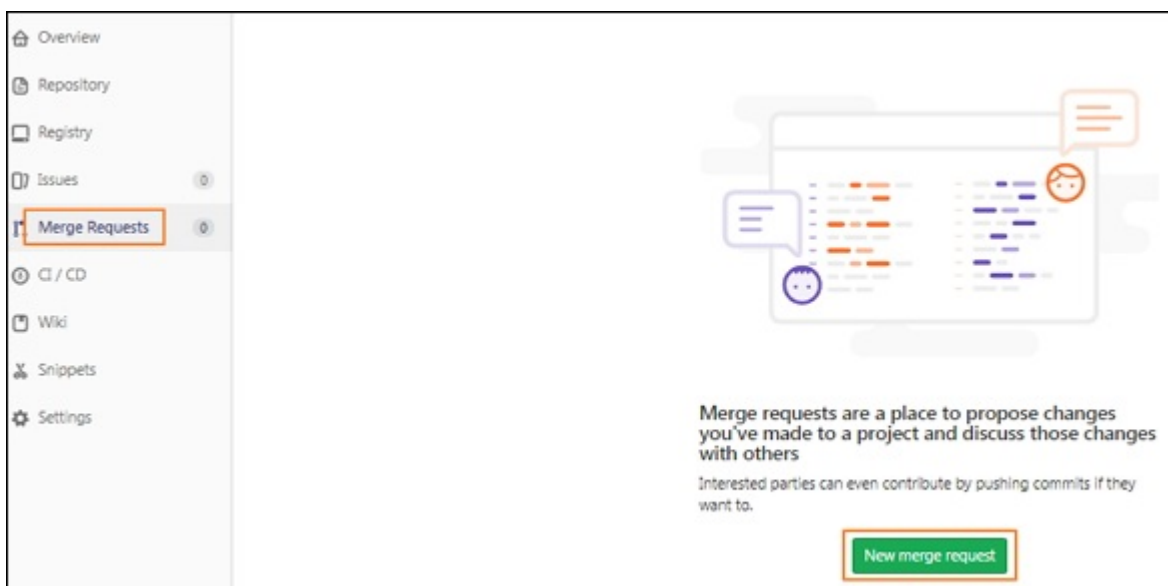

Steps for Merging Request

Step 1 – Before creating new merging request, there should be a created branch in the GitLab. You can refer this chapter for creating the branch –

Step 2 – Login to your GitLab account and go to your project under *Projects* section –

Step 3 – Click on the *Merge Requests* tab and then click on the *New merge request* button –

Step 4 – To merge the request, select the source branch and target branch from the dropdown and then click on the *Compare branches and continue* button as shown below –

New Merge Request

From issue-fix into master

Title
Fix a bug
Start the title with `fix:` to prevent a **Work In Progress** merge request from being merged before it's ready.
Add description templates to help your contributors communicate effectively!

Description
